

# Therapeutic Stay for Adult Patients with Spinal Cord Injury

Minimum Duration:  
**14 Days**

This specialized program is designed for patients with complete spinal cord transection and integrates electroacupuncture with advanced rehabilitative care. The therapeutic regimen aims to support rehabilitation and enhance mobility through collaboration with expert physiotherapists and the use of electroacupuncture via the Ac-tive ENF method. This innovative approach to treating nerve paralysis combines medical acupuncture with principles of physical medicine commonly applied in rehabilitation therapy.

## Rehabilitation Program Includes:
